

Digital Mindset

Main Pillars
for the Italian Air Force

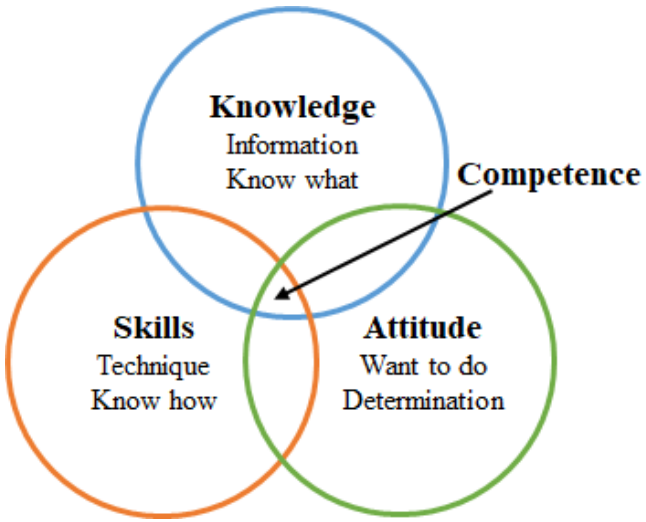

LOGOSNET

A digitally minded leadership requires an entirely new mindset.

There are at least five important dimensions that make up the digital mindset. They may seem paradoxical or contradictory, but they are crucial to dealing with the digital transformation upon us.

- Digital literacy about the main 4.0 and 5.0 drivers
- Data-driven decision making
- Cognitive flexibility and adaption to constantly changing environments
- Metacognition
- Internal locus of control
- Collaborative and inclusive work-style
- Virtual teamwork
- Agility management
- Networking
